

My application appearance.

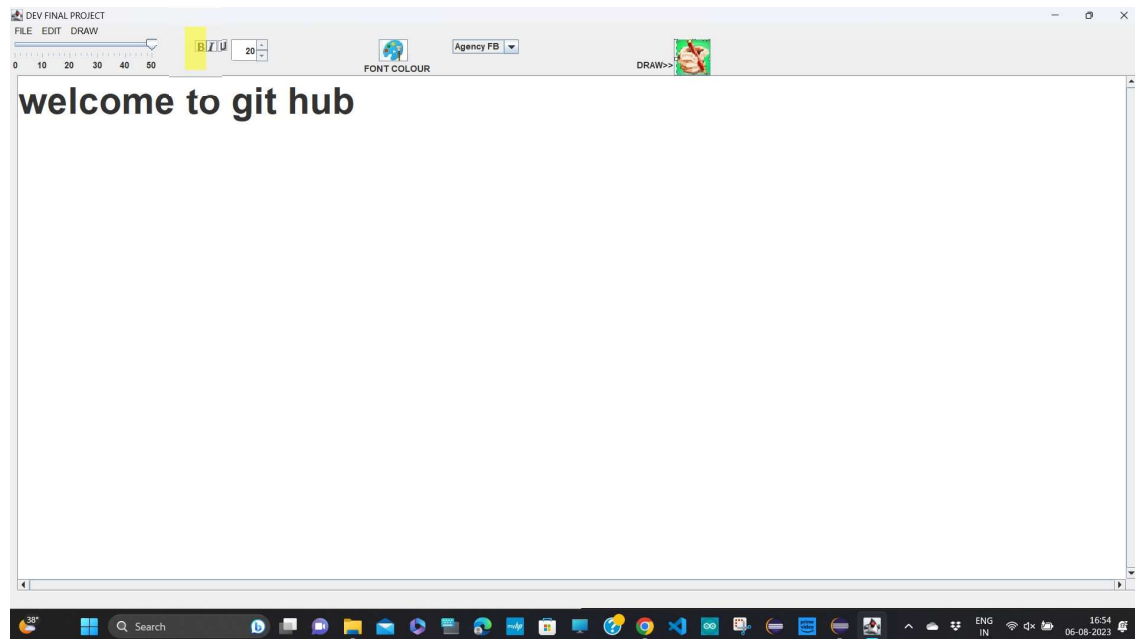

I have entered an text called “welcome to git hub”

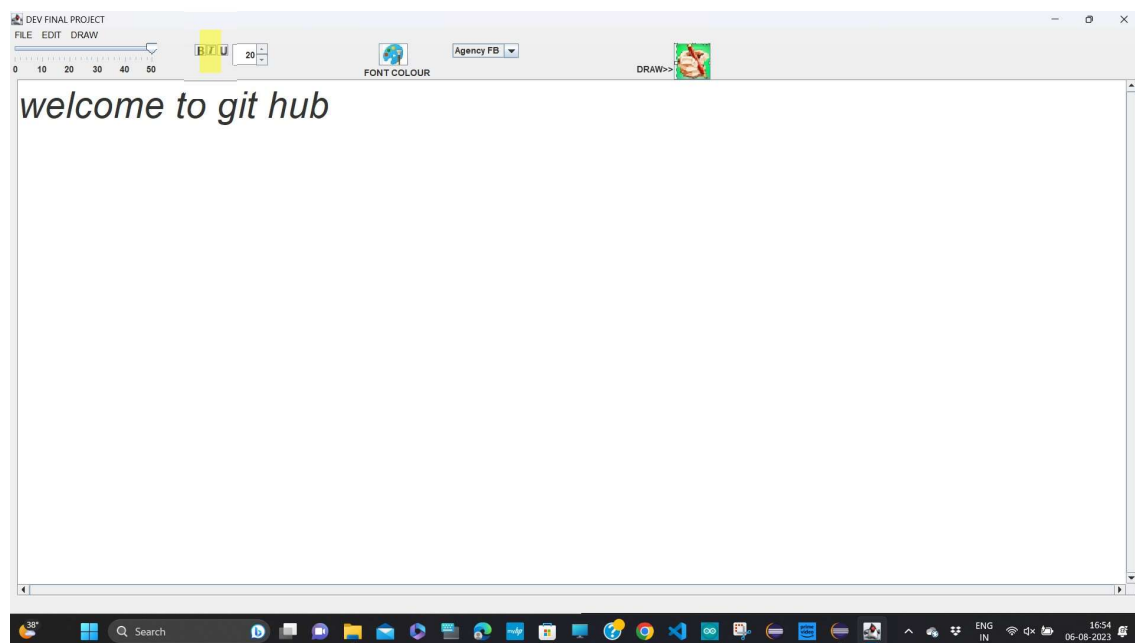

On moving the slider the size changes.

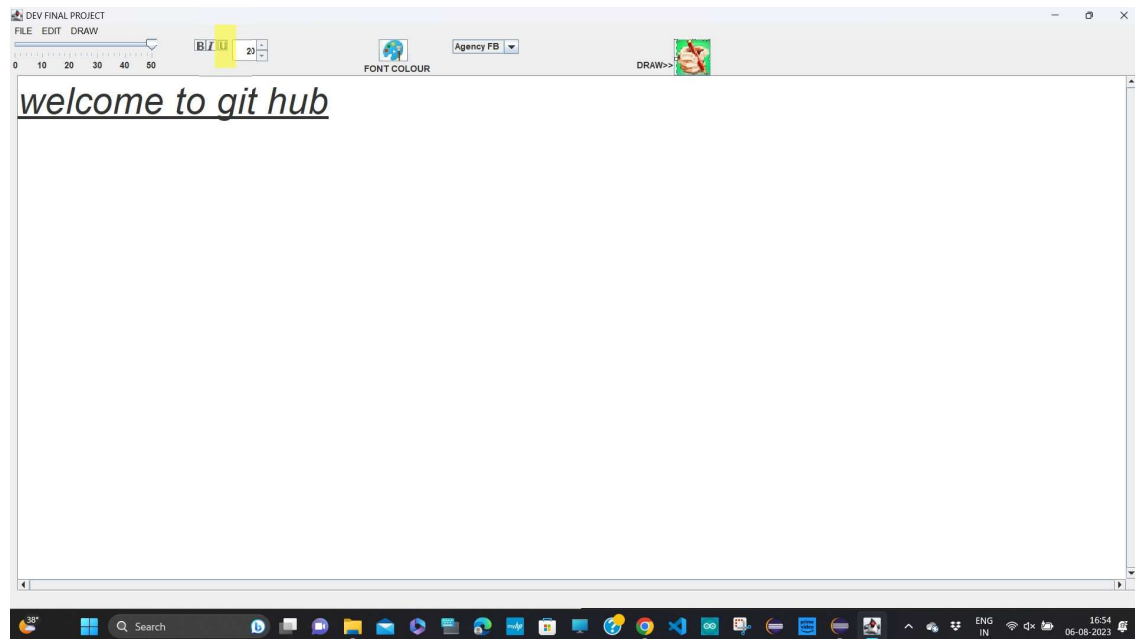

On clicking “bold” the statement becomes bold

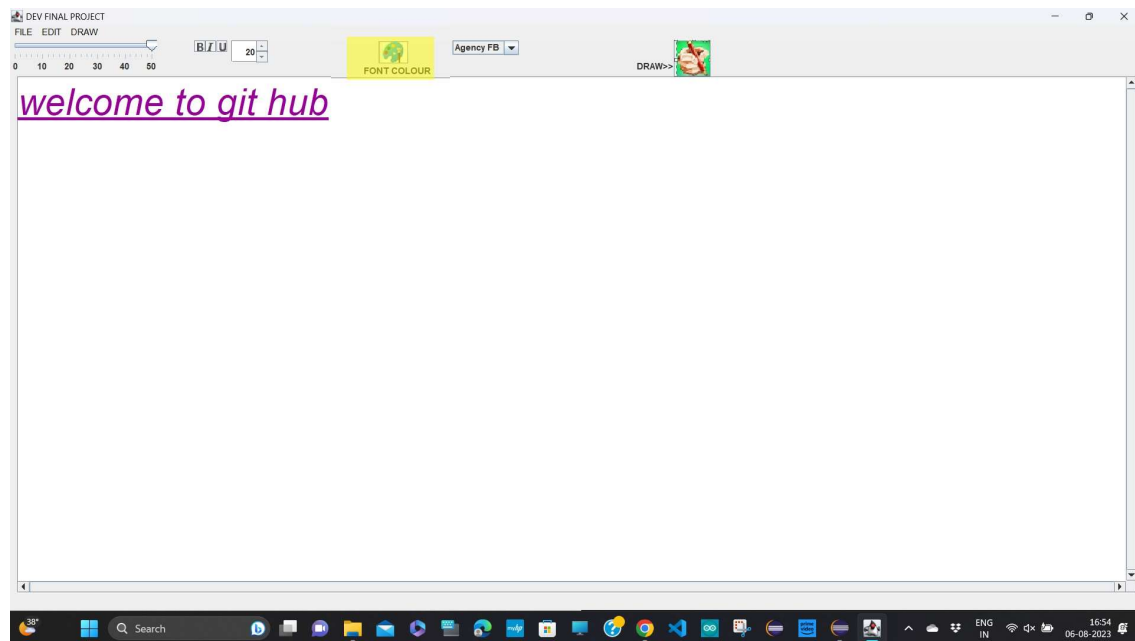

On clicking “italics” the statement becomes italics

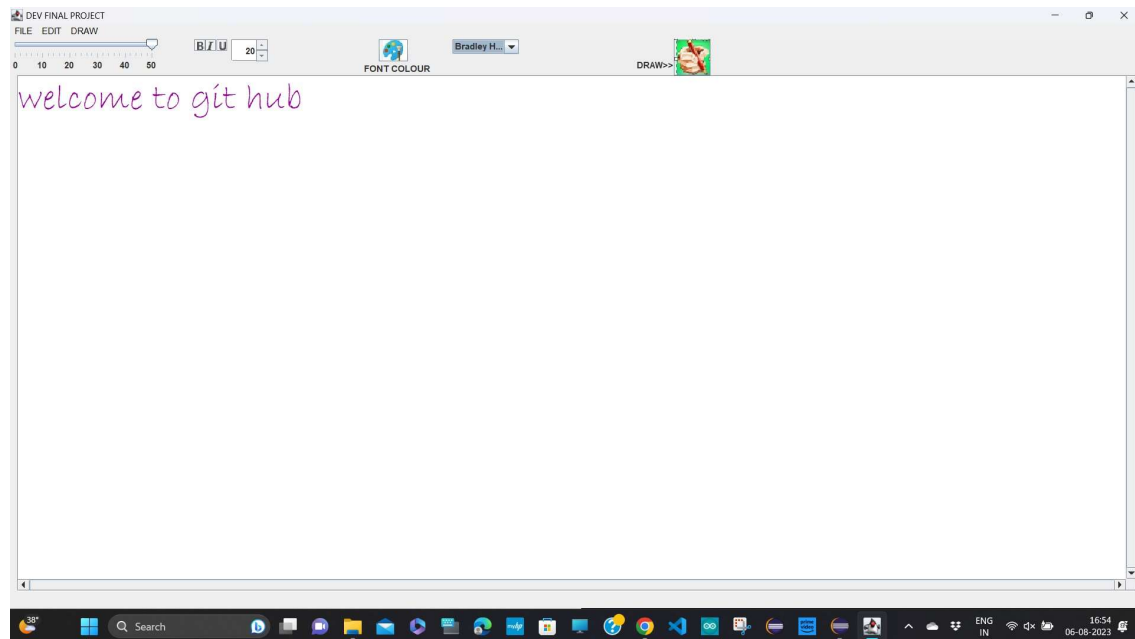

On clicking “underline” the statement becomes underlined

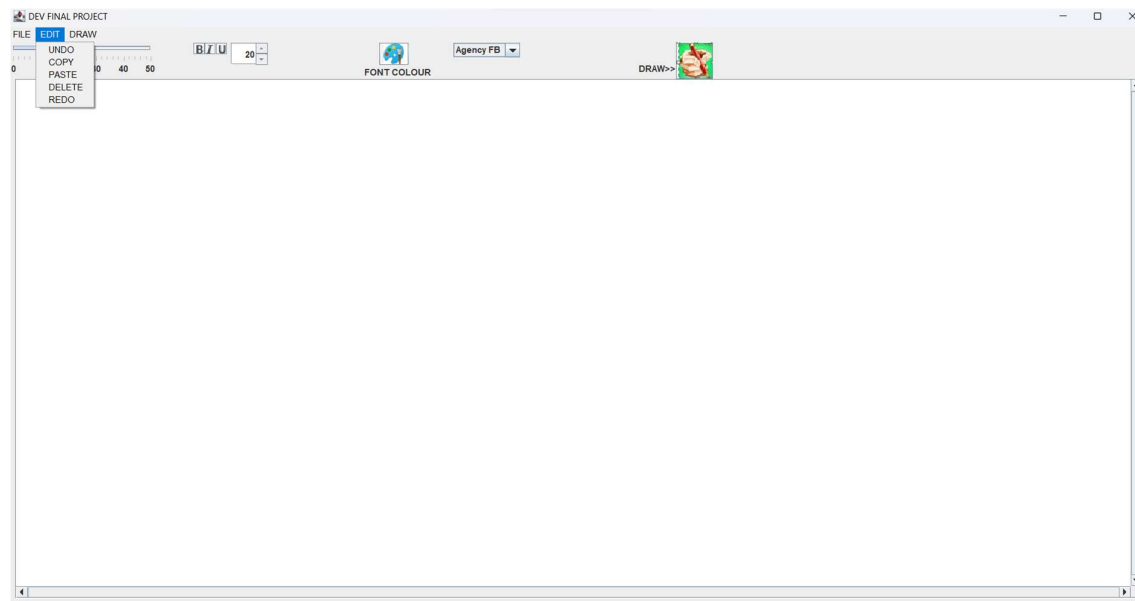

Changing the color using font color

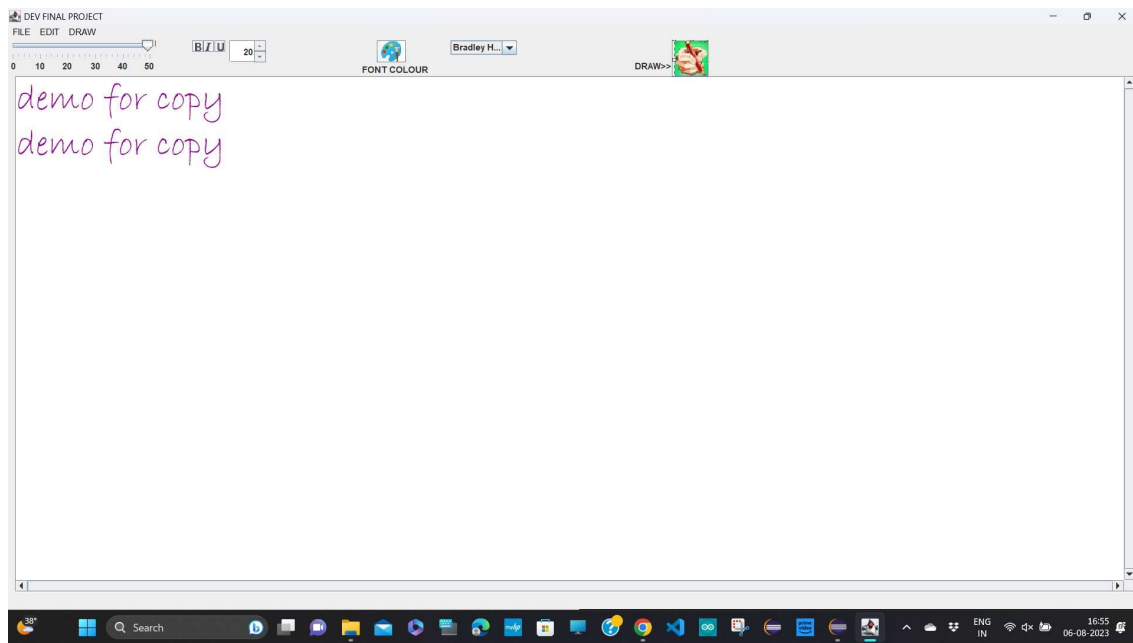

Changing the fonts

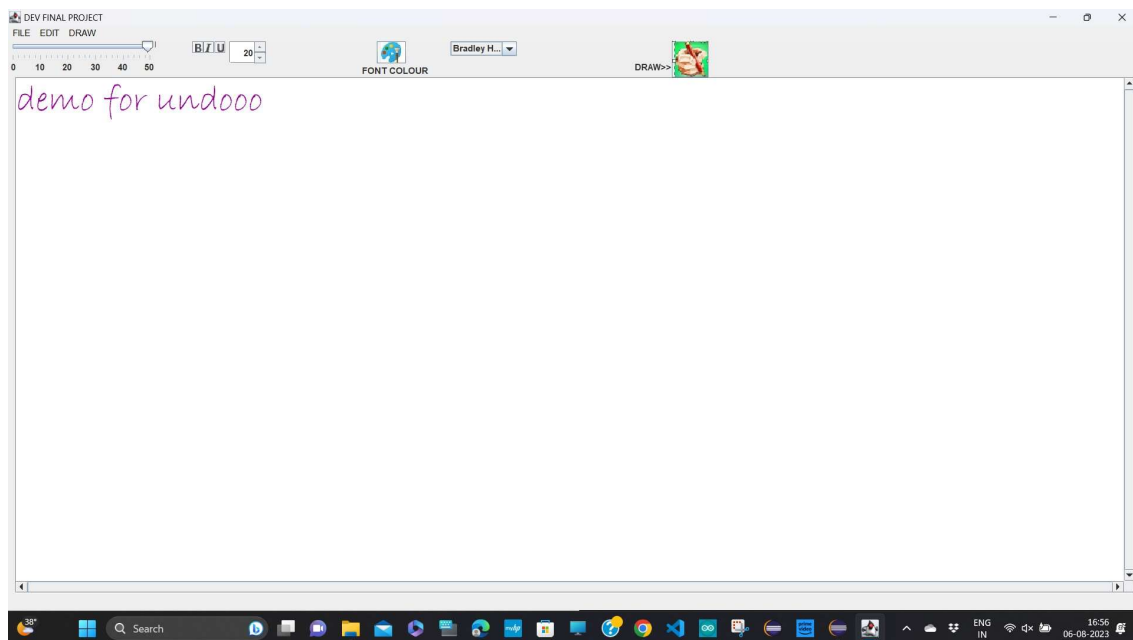

There is an option in edit to copy the text

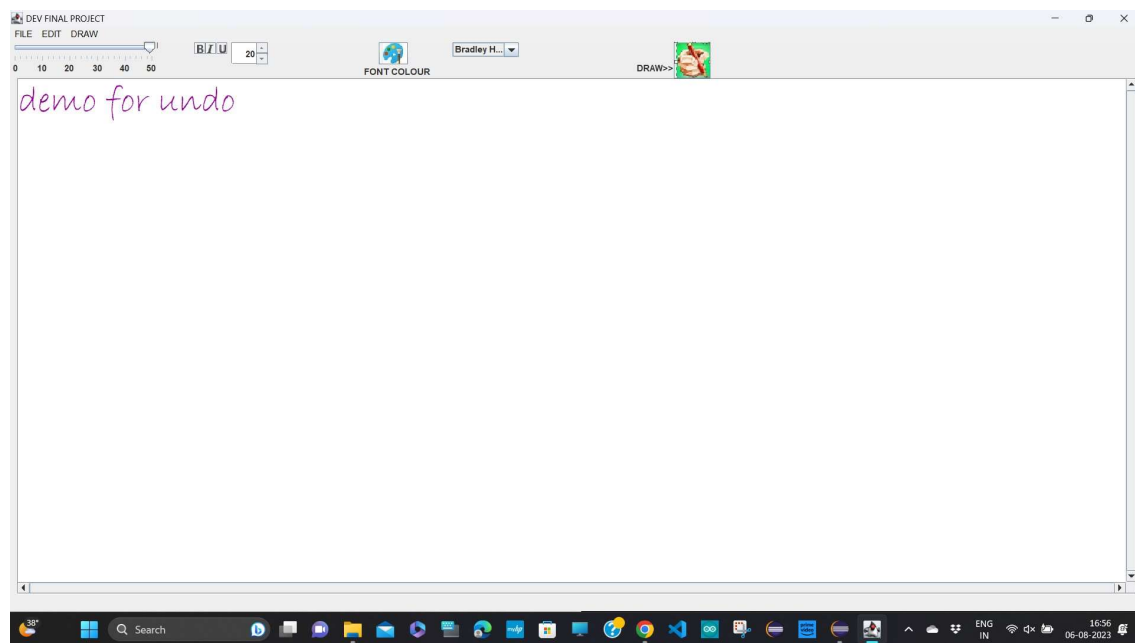

At first only “demo for copy” was there in text area after copy and paste we can see two times.

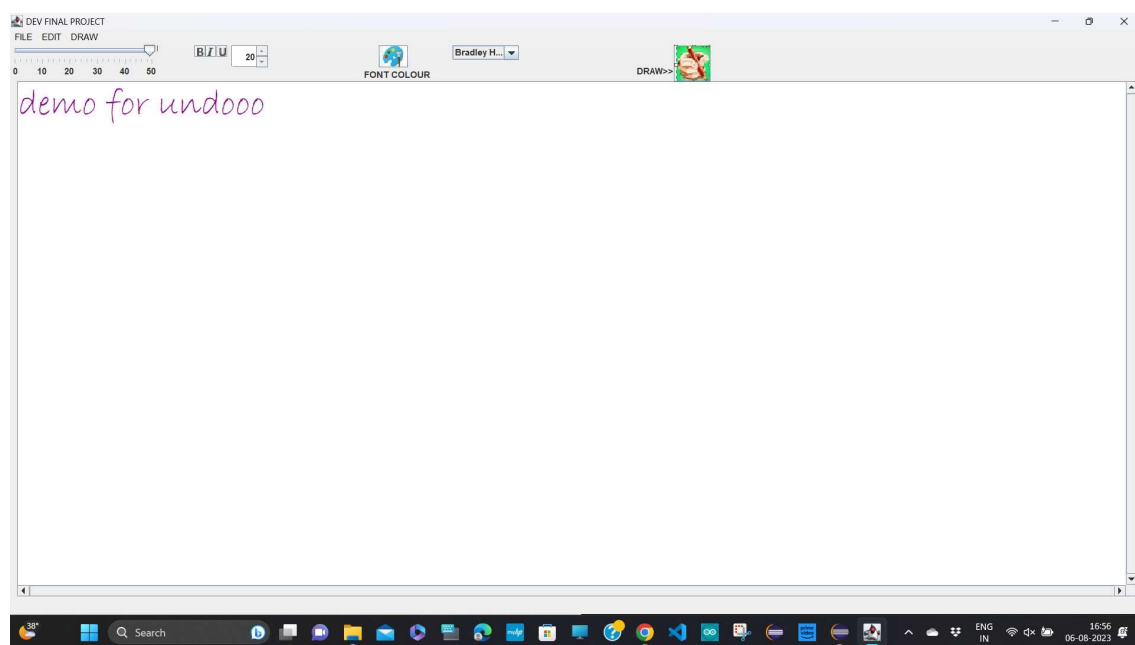

Before undo was clicked

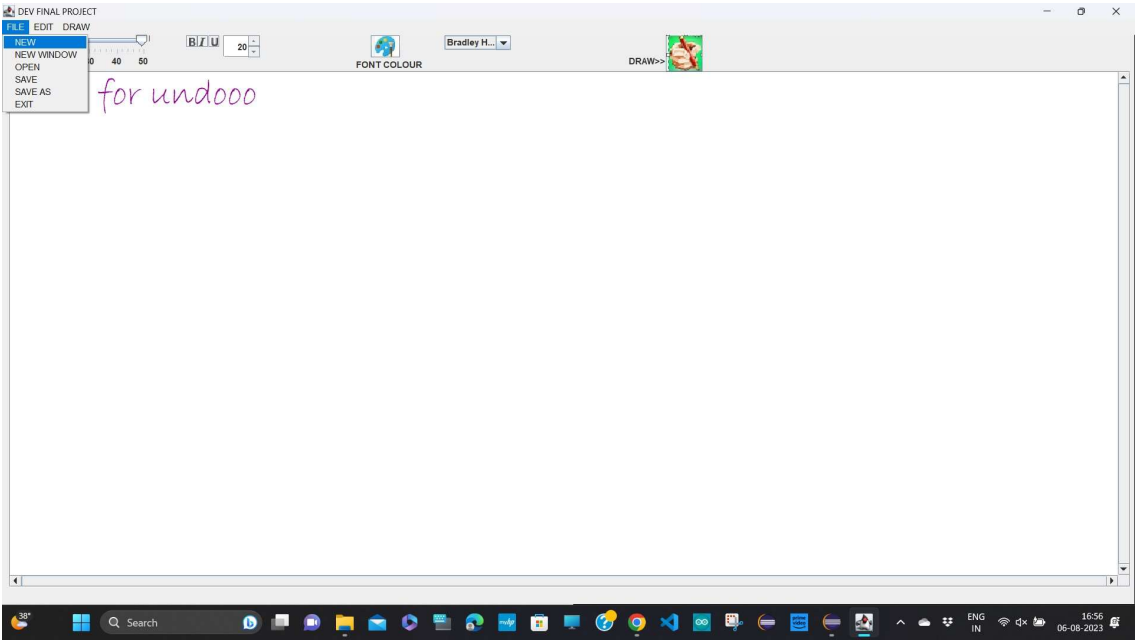

After undo is clicked the text changes

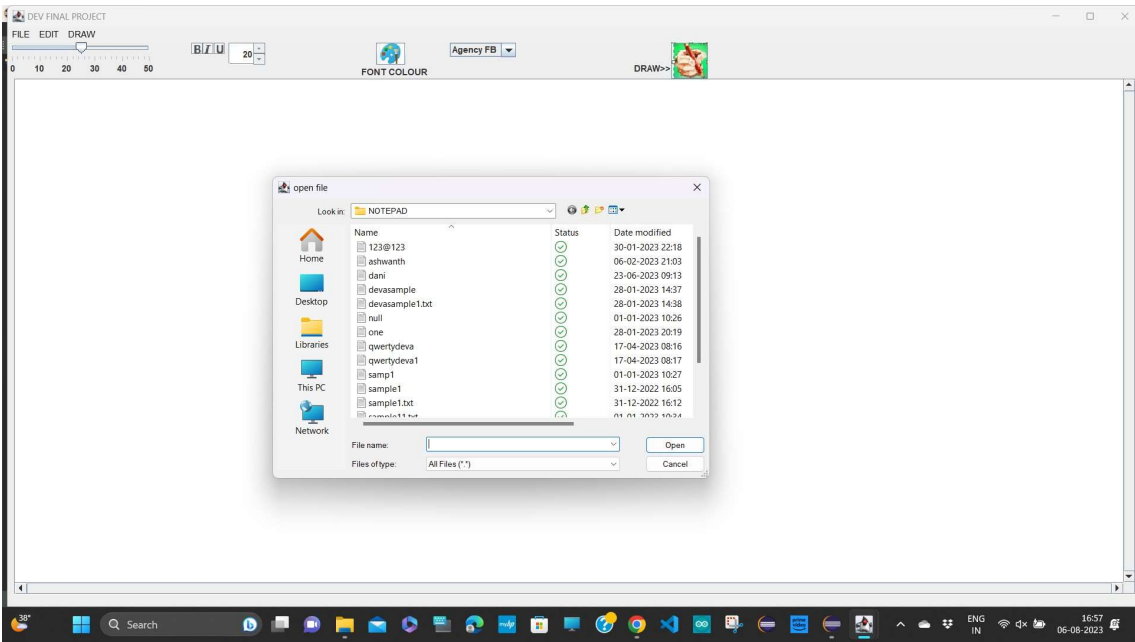

After clicking redo it comes back to the text what was there before redo.

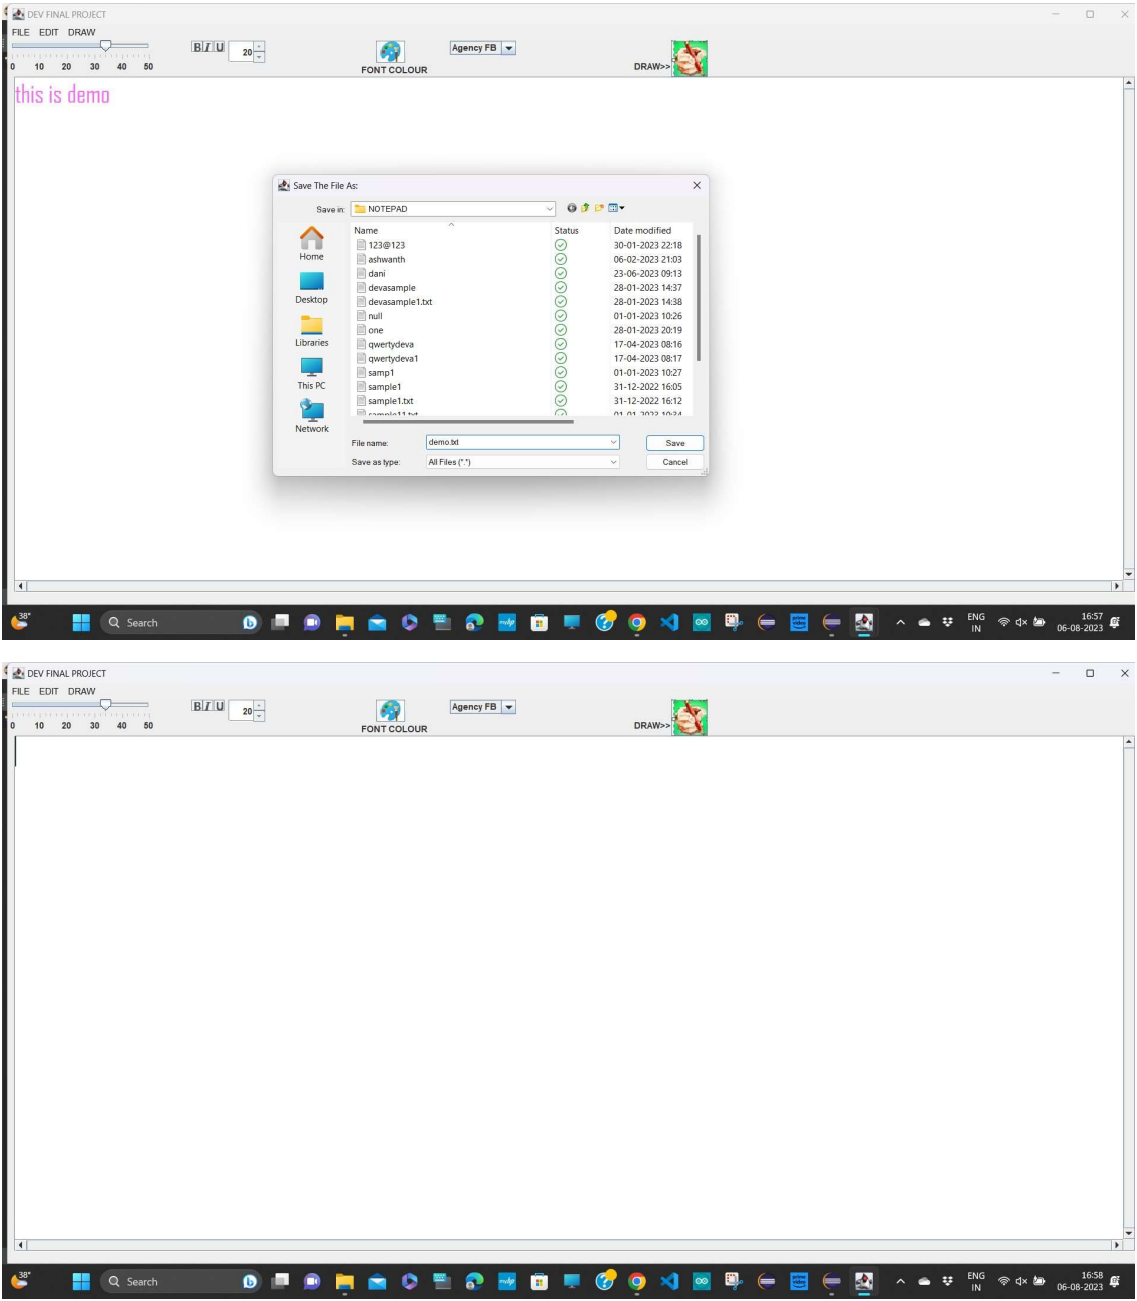

New option erases the content and creates a new text area;

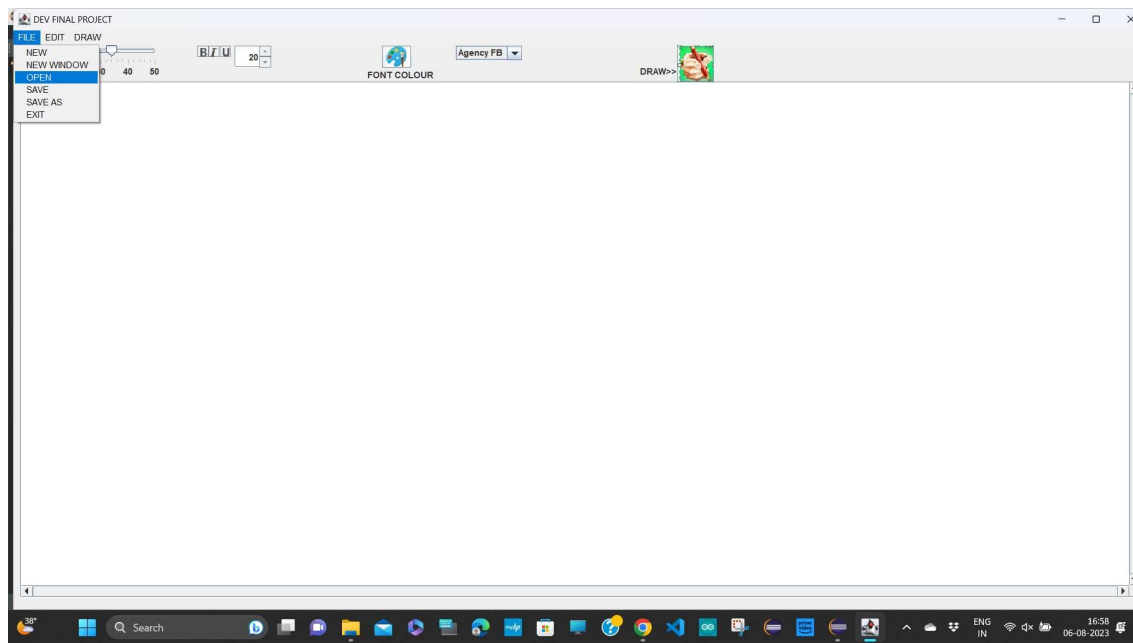

I have provided an dialog box option to save the file.

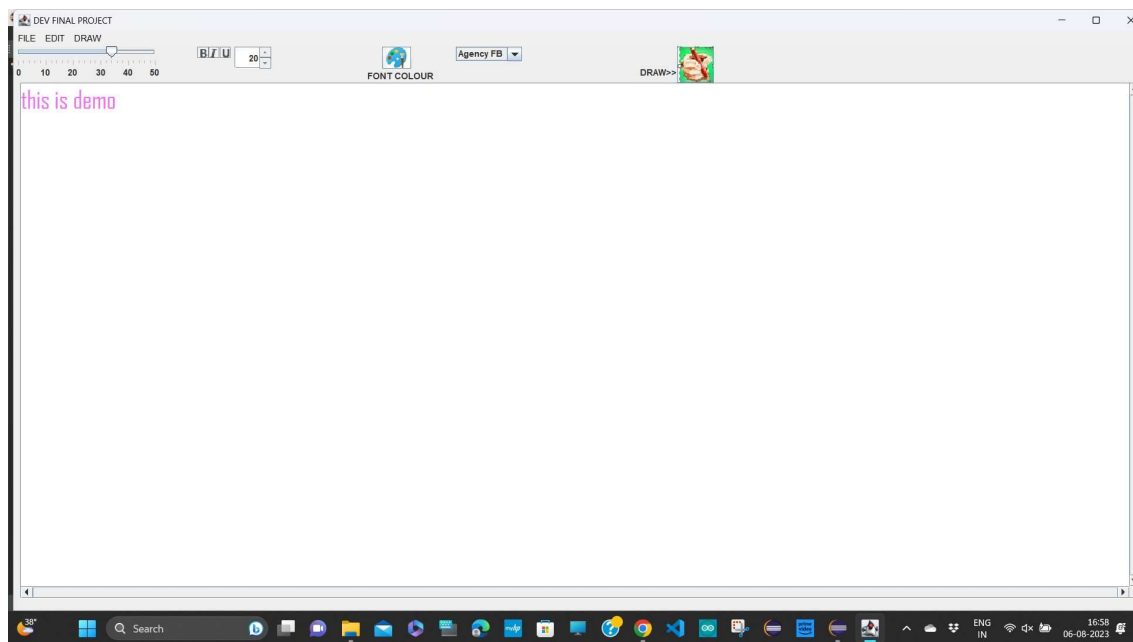

I am saving this file.

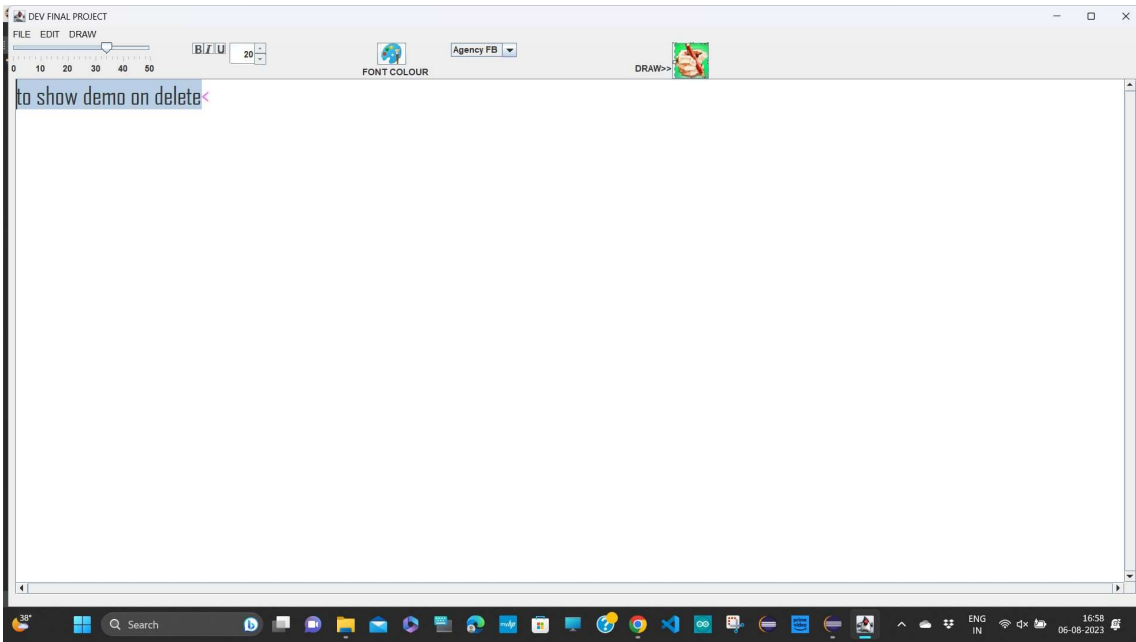

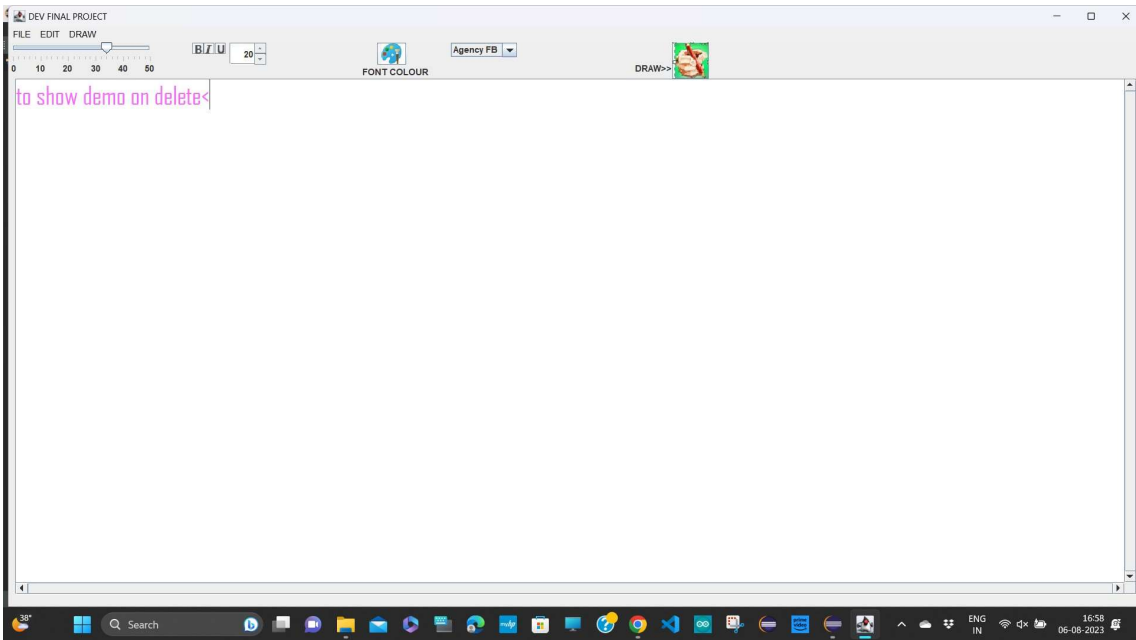

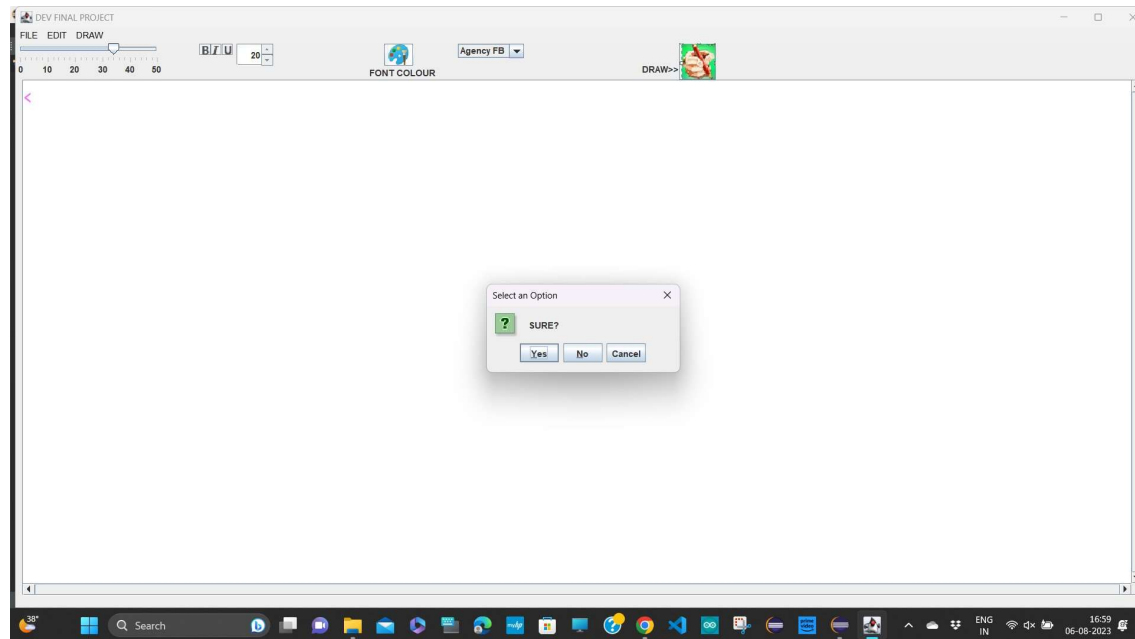

After opening the file we get the text back

There is an option for deleting .

After clicking delete we can see "<" in text area .
moreover I have added a window action listener where it asks for confirmation when closing the window.

There is also an vertical and horizontal scroller .
